

WATERWAY TO GO!

C-TEC's EP203 extinguisher panel installed at Ireland's new Waterways Centre

C-TEC's EP203 auto-extinguisher panel has been installed at the new £3 million headquarters of Waterways Ireland in Eniskillen, County Fermanagh.

Waterways Ireland is the North/South implementation body responsible for the management, maintenance, development and restoration of the inland navigable waterways, principally for recreational purposes. The organisation's impressive new building is located on the Sligo Road and provides a top quality-working environment for Waterways Ireland staff based at the site.

Two EP203 panels are now in operation – one in the computer server room safeguarding IT networks/computers and another in the building's archive department protecting precious documentation. Fully compliant with EN12094 part 1, the EP203 functions as a standard three-zone fire panel with extra circuitry for controlling the release of fire suppressing gas into areas where fires need to be extinguished quickly with minimal damage to equipment.

Says John Nesbitt of Atlas Fire & Security, the company which installed the system: "C-TEC's EP203 is a top quality product but is also priced very competitively. We particularly like the EP203's large graphical display with two-colour backlight which makes it very easy-to-install and operate".

In addition to being LPCB third-party certified to EN12094-1, the EP203 is also accredited to EN54-2 and EN54-4 and is therefore certifiable under the Construction Products Directive. Ideal for use in remote telecommunication outstations, unmanned chemical plants, computer rooms and any other area containing invaluable equipment, the EP203

epitomises quality, durability and reliability.

Established for over 25 years, Atlas Fire and Security is an independent provider of top quality fire and security solutions. Based in Belfast, the company is a one-stop shop for fire and security products and offers cost-effective and reliable installation, maintenance and commissioning contracts for any size of project.
